

Fuel Oil Fill Point Cabinets

Landon Kingsway fuel fill point cabinets have been designed for filling fuel storage tanks. They are housed within the fabric of the building or built into a boundary wall. A double locking handle feature limits access to authorised personnel only. Tank levels can be read without accessing the cabinet through a polycarbonate window.

The Landon Kingsway Fuel Fillpoint Cabinet conforms with metric brickwork and is available as a standard unit in single, double and triple sizes. The Fuel Fillpoint Cabinet can be fitted with isolation valves up to 100mm in diameter, non return valves and dry break couplings available as an option.

Cabinet Construction

The entire cabinet is constructed from 16 SWG Zintec steel then powder coated grey. A shatter proof polycarbonate viewing window is provided as standard for easy reading. Contents gauges are supplied as an extra. Studs are pre installed to accept 150mm gauges and the Landon Kingsway Filguard Alarm Panel. Holes are pre drilled to accept Fill Valve assemblies. Internal lighting with automatic switching is also available as an option. The door is completely weather sealed. A supporting gas strut eases opening and closing and maintains a fully open position when required.

Features

- Conforms with metric brickwork
- Door & frame Zintec Steel then Finished In Grey Polyester Powder Finish
- Polycarbonate vandal proof window
- Gas filled support strut
- Lockable door to restrict access
- Accommodates 25mm, 50mm 65mm 80mm and 100mm fill valves (Conforming to BS 799 Part 1)
- Non-Standard versions available to customers own specifications
- Stainless steel versions available
- 30mm Architrave

Optional Extras

- Filguard high level alarm panel
- Filguard float sensing unit
- Capacitance level controls
- Hydrostatic contents gauges
- Lighting & switching assembly
- Fill valve assembly

Models in the Range

- A Type Cabinet – one fill valve
- B Type Cabinet – two fill valves
- C Type Cabinet – three fill valves

Available with or without viewing window

Fill Valve Assemblies sizes

- 25mm
- 50mm
- 65mm
- 80mm
- 100mm
