

Parker 218B-SS Tube Cutter

An adjustable tube cutter which produces a clean square end with no external burr and minimum internal burrs. The design of this cutter not only allows accurate positioning of the tubing onto the rollers but also allows the cutter wheel to be positioned both quickly and easily.

This cutter is suitable to be used on copper, aluminium, steel and stainless steel tubing from 1/8" to 1 1/8" O.D. and comes complete with a spare cutter wheel located on the handle.

Replacement cutting wheels available. Part no. 218B-WHEEL-SS
